

City of Spicer IMPERVIOUS SURFACE CALCULATION WORKSHEET

PO BOX 656, SPICER, MN 56288
 320.796.5562 | cityofspicer.com

NAME: _____
 ADDRESS: _____
 PARCEL #: _____

Impervious Surface Limits
 Regular Residential: 40% • Lakeshore: 25% • Natural Environmental Lakeshore: 20%

Use the following table to Calculate Total Impervious Surface Area
 (Complete all that apply. Example calculation on backside of form)

TOTAL LOT AREA: _____

Impervious Surface Item	Dimensions	Area (ft ²)
Proposed or Existing House		
Proposed Addition		
Proposed Accessory Building or Garage		
Existing Accessory Building 1		
Existing Accessory Building 2		
Sidewalk(s)		
Patio(s) & Deck(s)		
Driveway and Parking Area (including Gravel Surfaced Areas)		
Other		
Attach additional sheet as anecessary		Total:
Total Impervious Area %:		

I certify that the above information is true and accurate to the best of my knowledge and that I have included all existing or proposed impervious surfaces. I understand that supplying erroneous information may result in the need to remove impervious surfaces if it is discovered that the maximum coverage has been exceeded.

Signature of Applicant _____ Date _____

This calculation sheet is a necessary attachment for all land use/building permit applications in shoreland and residential zoning districts. Because of the impact of storm water runoff on surface water, the City of Spicer Surface (Storm) Water Management Ordinance limits the amount of impervious surface coverage allowed in shoreland and residential areas. In order to assure compliance with this ordinance, an accurate calculation of the amount of impervious surface coverage is needed. A short definition of impervious surface is "any constructed hard surface that prevents or retards the flow of water into the soil". Examples of impervious surfaces include rooftops, sidewalks, parking lots, patios, and roads or driveways made of asphalt, concrete or gravel and wood decks.

EXAMPLE table to Calculate Total Impervious Surface Area

Total Lot Area: 8580

Impervious Surface Item	Dimensions	Area (ft ²)
Proposed or Existing House		1250
Proposed Addition		
Proposed Accessory Building or Garage		
Existing Accessory Building 1		400
Existing Accessory Building 2		
Sidewalk(s)	West	56
	North	84
	Front Entrance	30
Patio(s)	Circle	96
	Walk	36
Driveway and Parking Area (including Gravel Surfaced Areas)	6 x 6 concrete slabs x13	200
Other		
Attach additional sheet as anecessary		Total: 2152
Total Impervious Area %	Formula=Area(ft ²) / Total Lot Area	2152/8580=25%

The complete ordinance can be found in Shoreland Management District Document, Article XIII, Section 13.05 Zoning & Water Supply/Sanitary provisions, E. Storm water management, #3. Impervious Standards
